

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### **5    Listing of Claims:**

Claims 1-17 (Cancelled)

Claim 18 (New) An electronic apparatus comprising:

- 10        a housing comprising a part of the housing made by a material that can be seen  
             through, wherein the part of the housing further comprises a wire mesh that  
             is constructed by a plurality of wires and disposed in the part of the housing  
             to shield ElectroMagnetic Interference (EMI);  
             a motherboard installed inside the housing;
- 15        a processor installed on the motherboard inside the housing for processing  
             programs and data; and  
             a memory installed on the motherboard inside the housing for storing programs  
             and data.

- 20    Claim 19 (New) The electronic apparatus of claim 18 wherein the part of the housing  
         is made from glass.

Claim 20 (New) The electronic apparatus of claim 18 wherein the part of the housing  
is made from plastic.

25

Claim 21 (New) The electronic apparatus of claim 18 wherein a user can check the  
inside of the housing by seeing through the part of the housing.

- Claim 22 (New) An electronic apparatus comprising a housing for installing a
- 30        motherboard, characterized in that the electronic apparatus comprises a part of  
             the housing made by a material that can be seen through, wherein the part of the  
             housing further comprises a wire mesh that is constructed by a plurality of wires

and disposed in the part of the housing to shield ElectroMagnetic Interference (EMI).

5      Claim 23 (New) The electronic apparatus of claim 22 wherein the part of the housing is made from glass.

Claim 24 (New) The electronic apparatus of claim 22 wherein the part of the housing is made from plastic.

10      Claim 25 (New) The electronic apparatus of claim 22 wherein a user can check the inside of the housing by seeing through the part of the housing.
